

OUR GROUP SERVICES

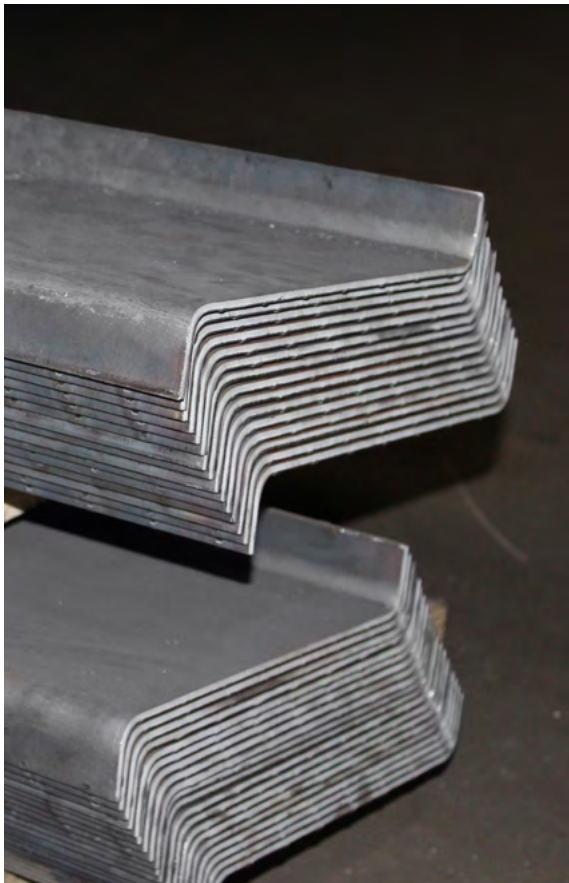

PROFILING & PROCESSING.

BUILDING TRUST, BEYOND SUPPLY

BMGROUP

A MARUBENI ITOCHU STEEL COMPANY

ABOUT THE BM GROUP

At the BM Group, we do **more than steel**—we provide tailored solutions that help our customers work smarter, reduce waste, and enhance productivity.

Our **comprehensive range of value-added services** ensures that you receive steel products processed to your exact requirements, eliminating unnecessary handling, reducing lead times, and improving cost efficiency.

THE ADVANTAGE OF IN-HOUSE PROCESSING

- 

Reduced Lead Times - No need to send materials to third-party processors, receive steel ready for immediate use
- 

Cost Savings - Minimize transport, handling, and wastage costs by sourcing pre-processed materials.
- 

Consistent Quality - Advanced machinery ensures accuracy, repeatability, and compliance with specifications.
- 

Optimised Production - Free up your internal resources and focus on assembly, fabrication, or construction.
- 

Supply Chain Efficiency - Streamline procurement with a single, reliable source for both material supply and processing.
- 

Quick Deliveries - Our nationwide depots allow for fast deliveries with a HIAB option for offloading.

WHAT WE CAN OFFER

We are more than just steel stockholders, we have an experienced in-house profiling team and a suite of state-of-the-art machinery to provide you all the steel services you require, from profiling and cutting to folding and machining.

STEEL STOCK
Our depots hold a variety of stock to ensure we always have the size and grade you need.

FULL SUPPORT
A support team dedicated to providing a smooth experience from design to delivery.

MACHINERY
Every depot has a huge range of, or access to, state-of-the-art machinery.

UKCA/CE CERTIFICATION

Material supplied is from quality assured sources and finished components are produced up to, and including Execution Class 4.

VALUE ADDED SERVICES

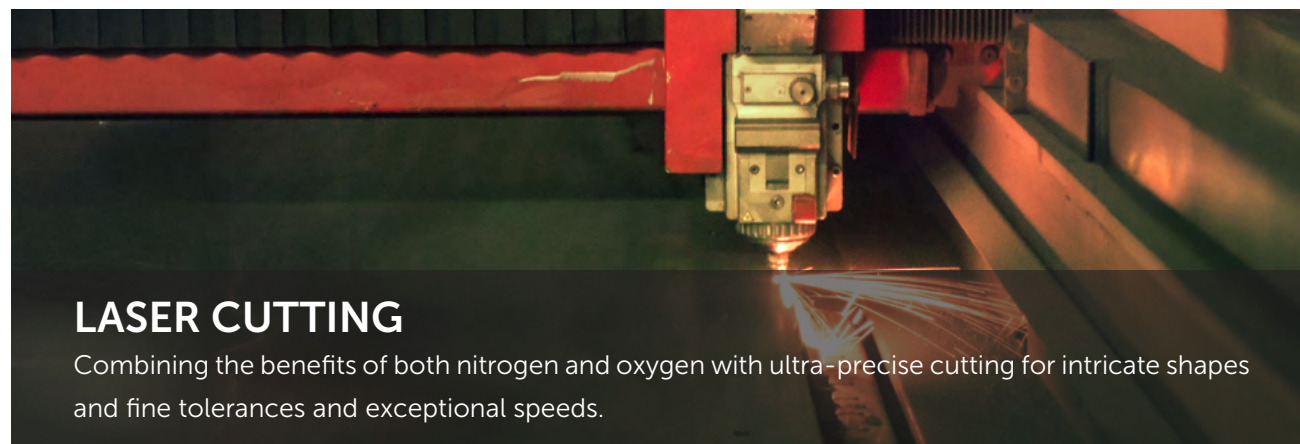

PLASMA CUTTING

High-speed, precision cutting for thick and thin materials, ideal for structural components and custom profiles.

GAS/OXY-FUEL CUTTING

Cost-effective method for cutting thick steel sections with excellent edge quality.

LASER CUTTING

Combining the benefits of both nitrogen and oxygen with ultra-precise cutting for intricate shapes and fine tolerances and exceptional speeds.

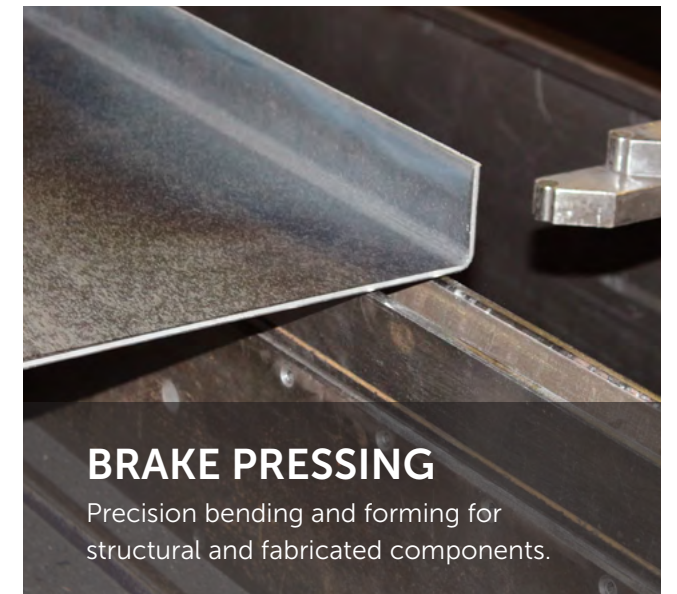

DRILLING

CNC-controlled hole drilling for structural fabrication.

GUILLOTINE CUTTING

Fast, clean shearing of sheet and plate steel to exact dimensions.

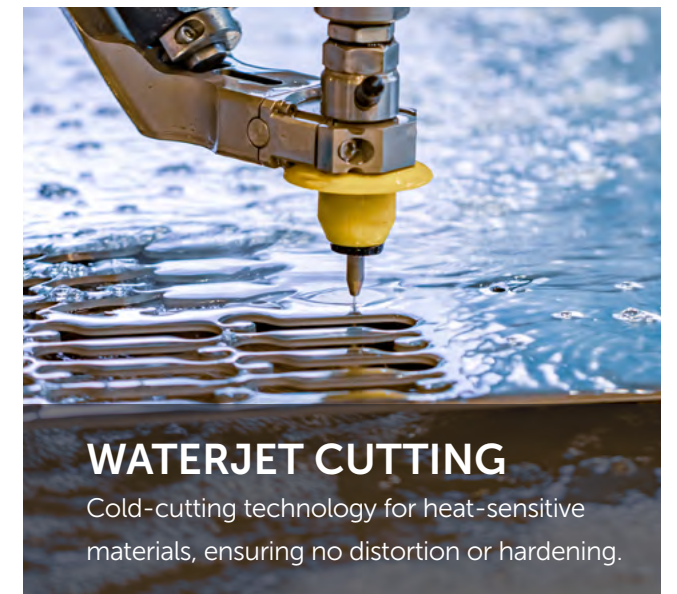

BRAKE PRESSING

Precision bending and forming for structural and fabricated components.

CROPPING/PUNCHING

Efficient cutting and hole punching for high-volume production.

WATERJET CUTTING

Cold-cutting technology for heat-sensitive materials, ensuring no distortion or hardening.

FABRICATION

Assembly, welding, and preparation of ready-to-use steel components.

CNC MACHINING

High-precision milling, turning, and drilling for custom-engineered parts.

CONTACT INFORMATION
